

EMI Shielding and Conformal Coating

The Ag, or Ag coated Cu filled shielding and grounding products provide effective EMI solutions to protect electronic products from electromagnetic and radio frequency (EMI / RFI) leakage and electrostatic discharge (ESD).

Conformal coatings from United Adhesives protect electronics and filling voids and cracks. They have excellent moisture and corrosion protection, and resistance to dust and dirt particles. They are used for coating electronic devices to protect chips, silicon dies, components, and wire bonds.

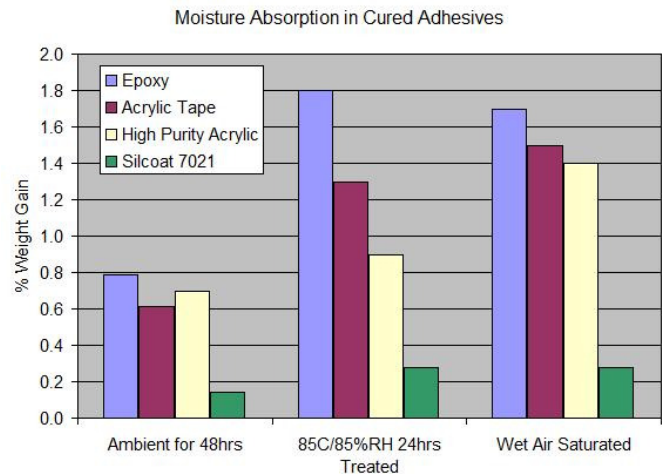

Name	E-shield 6430	E-Shield 6531	E-shield 6037	Silcoat 7021	Silcoat SC8022	Silcoat SC8026
Chemical Base	Epoxy / Ag	Silicone / Ag-Cu	Acrylic / Ag-Cu	Silicone Gel	Silicone Gel	Silicone Gel
Features / Advantages	2-part fast cure. Sprayable. High electrical conductivity. Strong bonding strength	Good electrical conductivity. High moisture resistance. Flexibility for low stress. Low cost. Paintable.	Sprayable fluid. Good electrical conductivity. One-component. Low cost.	Moisture cure soft gel. Sprayable & dispensable. Easy apply. Excellent protection of moisture, media, & corrosion.	Soft coating and potting gel. Sprayable & dispensable. Excellent moisture & media resistance.	Soft Non-Sag gel. Dispensable. Excellent moisture and media resistance.
Typical Application	For EMI/RFI shielding. Easy to spray & dry. Good bonding to most plastic and metal surfaces.	For interior EMI/RFI shielding. Good for area requiring flexibility & stress compliance.	For EMI/RFI shielding. Easy to spray and dry. Good bonding to most plastic and metal surfaces.	Conformal coat to protect electronics from moisture, oil, fluid, ducts, particles, etc. and fill voids, cracks.	For coating or potting of electronic devices to protect dies, components, wirebonds etc.	For globe-top encapsulation of electronic devices to protect chips, dies, components, wirebonds etc.
